Lake Villa Club Gives Halloween Fete for Children

Harvest Dance is Planned for Young People Later in Year

A Halloween party, complete with apples, a costume contest, games and refreshments, was sponsored by the Lake Villa Men's Community club for Lake Villa children and young people in the gymnasium there Wednesday evening.

The club is planning a Harvest dance for the young people of the community at a later date, President Dan S. Boyer announces.

Its regular program of handicraft and other activities is also in progress.

Directors and officers of the club and others in its membership, as individuals, contributed a total of \$225 to the fund providing lights on Antioch Township High school's athletic field recently.

In keeping with a challenge he had made to the Lake Villa group at an earlier date, C. K. Anderson of the Antioch Lions club matched this sum with an equal amount, so that a total of \$450 was realized for the lighting fund through the generosity and sportsmanship of "C. K." and the Lake Villa club.

Special Handling Urged for Soft Corn by Nichols

(By Ray T. Nichols, Lake Co. Farm Advisor)

(CONTINUED FROM LAST WEEK)

Cut and Shock Soft Corn

It has always been a common practice outside commercial corn-producing areas to cut and shock corn in the field for fodder and to husk the ears as needed during the winter. This practice may be used for handling soft corn, although there is danger of mold. If this method is used, it is suggested that part of the rows be cut and set up to make shocks about one-half the desired size. A second cutting should then be made several days later and used to build out the shocks to full size.

Husk and Crib Soft Corn

If the corn is reasonably mature when frosted, with moisture contents of 26 to 35 percent, it may be husked and cribbed. Special attention is necessary, however, both in handling the corn in providing air circulation, to keep it from spoiling. The following recommendations are offered as the best-known safeguard against loss or excessive damage:

1. Husk the corn clean. Husks and silks tend to hold moisture and prevent free circulation of air through cribbed corn. All rotten or extremely wet ears should be discarded.

2. Distribute the corn evenly as the crib is filled. A great deal of damage has been observed directly under the elevator spout, where the pile is more compact and where there is an accumulation of husks, silks, dirty shelled corn and broken kernels. This material prevents the circulation of air which is necessary for drying.

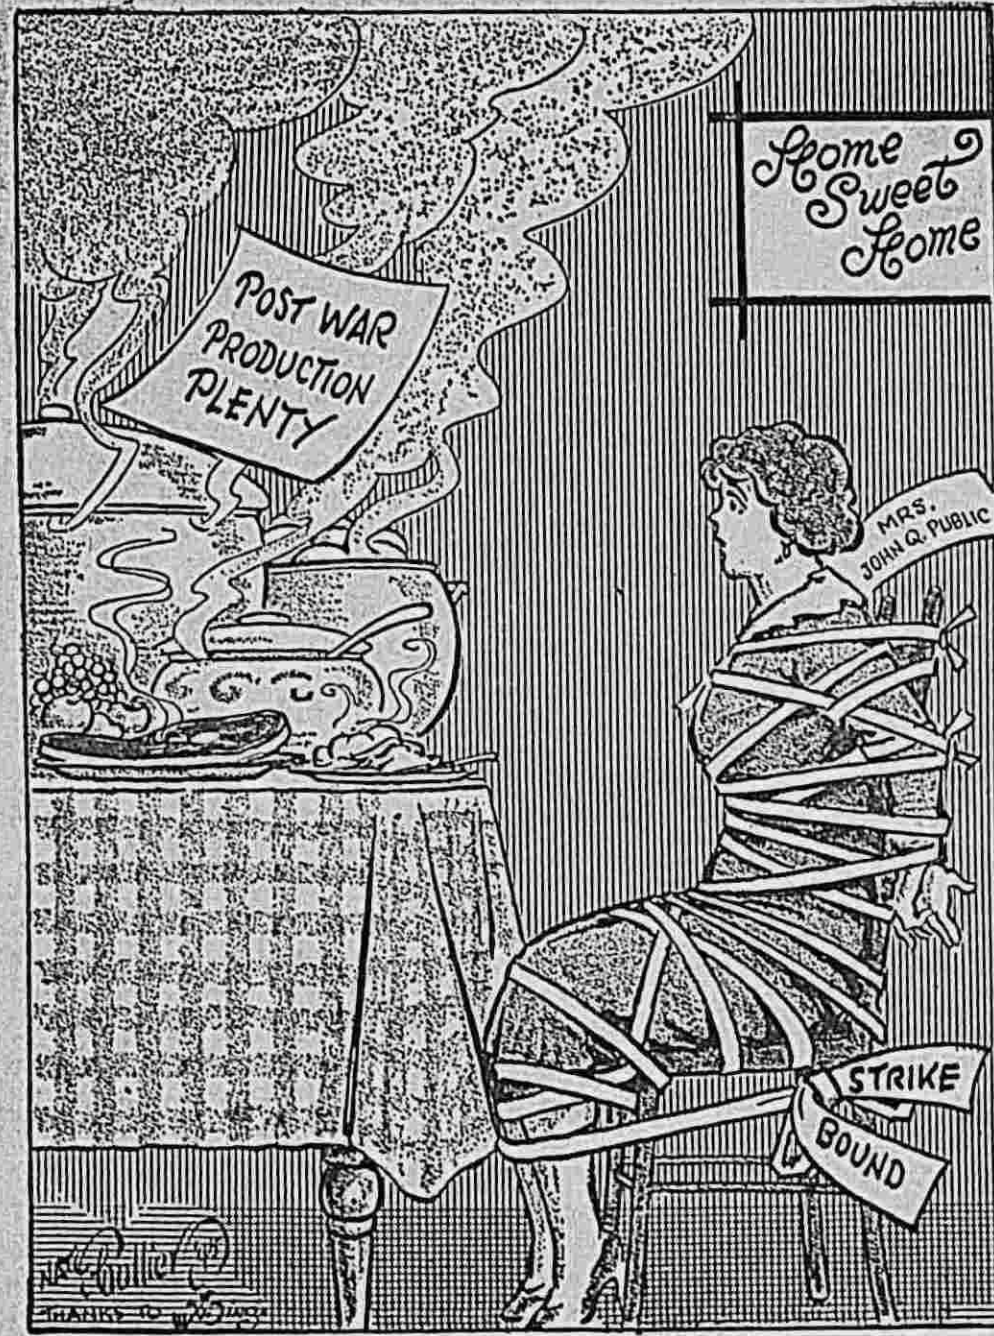

3. Salt the corn when it is cribbed. (doubtful value). Salting is highly recommended by some farmers, whereas in other cases it has not been successful. This method cannot be used with assurance, although some benefit may be derived from it. If salt is used, it should be distributed evenly throughout the crib at the rate of two pounds to each three bushels of corn.

4. Shell and sell while corn is frozen. Corn is least likely to mold and rot in the late fall and winter, when average temperatures are below 40°F. Soft corn can be shelled and sold to the elevator while it is frozen. From there it is sent immediately to processing plants or to storage elevators, where it is artificially dried. In any case soft corn should be fed or sold before warm weather increases the rate of spoilage.

5. Proved means for air circulation, ventilation, or artificial drying. Experiments indicate that electrical driven fans, silage-cutter blowers, or other methods of forced-air circulation will reduce moisture enough to make corn safe. In a few instance facilities are available to supply heated air to the crib for more rapid drying. In general, however, the farm (Continued on page 5)

George White has presented to Marshal Fred Peterson a huge Hubbard squash grown by White on his new farm at Hebron. Earlier in the year, White had scratched the inscription, "Marshal Peterson" on the surface of one of his squashes. The letters grew and expanded with the squash. The Marshal was all the more pleased with the gift because the land on which it was raised was part of the land farmed by the Petersons when he was a boy.

HOLDING UP DINNER

Manzardo Takes Over Antioch Servicenter

Announcement was made by Bruno Manzardo this week that he has purchased the interests of his partner, Edward Gresens, in the Antioch Servicenter.

The Servicenter, located at the intersection of Highways 21 and 173, south of Antioch Township High school, was taken over by Manzardo and Gresens about a year ago.

They have established an excellent business during that period, and have made many friends who will wish Manzardo success in his management of the service station and garage.

The new arrangement, with Manzardo as sole proprietor, became effective Oct. 25.

Maywood Services Are Held Today for William H. Hansen

Retired Chicago Elevator Operator Dies at Son's Home

Services were held this afternoon in the Paul Fenne Funeral home, 201 Lake street, Maywood, for William H. Hansen, 84, who passed away Monday at 8 p. m. in the home of his son, Andrew, 1061 Victoria street, after a long illness.

The body was removed to the Strang Funeral home from the residence, and then sent from here to Maywood.

Burial was in Oak Ridge cemetery. Hansen was born in Fredrickshal, Norway, Aug. 23, 1864, coming to this country in 1877. He made his home in Maywood before coming to Antioch six years ago.

Hansen was a member of Maywood Lodge No. 246, Independent Order of Odd Fellows, and Sten Sture No. 32, I. O. S., of Maywood. He was a retired elevator operator, having been in the employ of the Continental Can company in Chicago.

In addition to his son, he is survived by a granddaughter, Mrs. Hazel M. Sheridan, Erie, Pa., and four grandchildren.

Chicago Painter Feared Drowned at Crooked Lake

No trace had been found, up to noon today, of Karl Rehfsuss, 40, 5355 School street, Chicago, who disappeared at Lake Villa Oct. 22, it was stated by the Lake county sheriff's department.

It was believed that Rehfsuss, a painter who had been doing some work at the Dietrich Fricke cottages at Crooked lake, might have been drowned, as a boat had drifted in to shore last Thursday with one oar dragging and the other missing. The Kenosha coast guard dragged the lake during the weekend, without result.

Fricke's automobile, groceries and extra clothing were found at one of the cabins.

I. O. O. F. Confers 50-year Jewel on William Runyard

Lake Lodge Honors 52-Year Member at His Home Oct. 24

William Runyard's 52 years of membership in the Odd Fellows' order were honored by Lake Lodge No. 723 last Wednesday evening when he was formally presented a 50-Year Membership pin at his home, 416 Harden street.

The members of the lodge assembled in the Odd Fellows' hall early in the evening, going to the Runyard home in a group for the presentation.

Noble Grand Fred Peterson, himself a 37-year member, bestowed the jewel on behalf of the organization. He also paid tribute to Runyard's many years of service to the order as a member and officer.

Runyard is a past grand of Lake lodge, having headed the Antioch organization for a number of years.

Bright Lights Cause Minor Auto Collision

First aid for minor injuries was given by the Antioch Rescue squad and Lake county sheriff's deputies to occupants of two automobiles involved in a minor collision in front of the C. F. Richards home on South Main street Wednesday evening at 7:20 o'clock.

The driver of one of the cars was reported to have been temporarily blinded by the lights of another vehicle.

A crew from the Antioch squad "stood by" throughout the visit of Landing Craft, Support, 1, to Waukegan the first part of the week, in response to a navy ruling that a Red Cross mobile unit be present during the visit of the craft, which was of the type used for hurling rockets during landing operations on Pacific islands.

Students to Enjoy Preview of "Janie"

A preview of the Junior class play, "Janie," is being planned for an assembly period at Antioch Township High school Friday.

Tickets for the presentation Thursday and Friday evenings, Nov. 8 and 9, in the school auditorium may be obtained from high school students. They are also available at some of the local stores.

Colorful posters made by the members of the Junior class were distributed through the business section of the town Wednesday afternoon.

Many Inspect New Ford on "V-8" Day

A glimpse of what the new Fords will be like was given to many Antioch area residents on the Antioch Garage's "V-8" Day, last Friday.

A new de luxe model grey club coupe was available for inspection in the garage's display room.

W. A. Rosing and son, Herman Rosing, proprietors, received many favorable comments on the new car.

Children Enjoy Halloween Treat, Parade, Movie

March Through Village from School to Theater in Costume

One of the largest and most successful of Antioch's annual Halloween parties for children of the communities was that staged last night. The party started with a costume parade from Antioch Grade school through the business district to the Antioch theater, with Richard Whitacre, principal of the school, in charge of the line of march.

The judging of costumes, by Mrs. Homer La Plant, Mrs. Arthur Trieger and Mrs. Harry J. Krueger, took place at the theater. Prizes were furnished through the courtesy of the Antioch Lions club, which, with the Grade school and the Antioch News, has acted as sponsor of these parties for many years.

A candy "treat" furnished by Ted Poulos of Ted's Sweet shop and Herman Holbek of the Antioch Five and Ten Cent store was presented to the children at this time.

Afterward the youngsters, who filled the theater to capacity, were guests of Fred B. Swanson for the movie, "The Cowboy and the Lady," starring Gary Cooper and Merle Oberon.

Richard Boyer Had Part in Creating U. S. "Triumph" Stamp

The discovery that the new three-cent United States stamp which shows American soldiers entering Paris, with the Arc de Triomphe in the background, was made from a picture which their son, Richard G. Boyer, had taken when he was an Office of War Information correspondent in France provided a real thrill for Mr. and Mrs. Dan S. Boyer of Cedarcrest Acres, Lake Villa, "Danny" revealed this week.

Mr. and Mrs. Boyer had seen the original print of the picture from which the engraving was made when their son first returned from overseas, but had not connected it with the stamp until their attention was called to it by a letter from another member of the family.

The stamps are now available at post offices in Antioch, Lake Villa and other villages in this area.

Victory Campaign Workers Needed, Says O. S. Klass

An appeal for additional volunteer workers is being made by Otto S. Klass, township chairman for the Victory Loan campaign which started Monday and will continue through November and the first week in December.

Klass says—"The war is over—but that's not the whole story. Let's finish the job! Why must we have a Victory loan?"

"First, to pay the bills for munitions and material already delivered and used.

"To pay the cost of guarding Germany and Japan.

"To pay for the care of our wounded and disabled.

"To pay for and provide benefits for eight million or more veterans to be discharged by next July.

"To keep the lid on price inflation. Government expenditures are being drastically reduced, and this will continue. Despite this, however, the aftermath of war carries grave responsibilities that must not be shirked, and in facing this task every American's help is needed."

Too Much Time — Or Too Little Interest?

We often wonder how they do it. We mean those people who complain because they "have nothing to do."

Ourselves, we always find the days too full of things to do, for the number of hours there are.

Sometimes we wonder whether the reason such folks find themselves with so much time on their hands is because they are so very efficient that they do everything so fast there isn't anything left to do—or whether they are lacking in a variety of interests.

In other words, maybe they really don't want anything to do—they merely want to be amused.

But we sure wish we could have the use of that time they've got on their hands and don't know what to do with.

If we didn't do anything else with it, we'd try to get caught up on our loafing.

"The Public Has Kind of a Crawlin' Common Sense, Only It's Slow"

The question many a returned serviceman has been asking—what happened to all steaks and roasts?—is given an answer, at least to the extent of 1,500 pounds, in a Chicago Tribune story on a senate war investigating committee's discoveries.

The story, written by William Moore, reports that "Sen Ferguson (R., Mich.) charged that the navy is responsible for the theft of a million dollars' worth of its supplies, which he said are being sold on the black market in Hawaiian taverns, hot dog stands, and souvenir shops.

"Chairman Mead (D., N. Y.) reprimanded two admirals on behalf of the committee for the laxity of the navy's investigation of its own scandals. . . .

"Mead told the admirals that a navy enlisted man got a deck court for having a 25 cent can of meat and noodles, 'while an officer who took 1,500 pounds of roasts and steaks goes free.' . . .

"The charge that the navy has permitted meats and other foodstuffs to be diverted to the Hawaiian black market . . . came at hearing on the case of Comdr. Laurence Blodgett, until recently commander of a navy ammunition depot at Pearl Harbor. . . .

"The meat and butter, marked as Blodgett's per-

sonal property, were found last February in a Pearl Harbor navy refrigerator by Lt. Col. Iven C. Stickney, a marine inspector. Stickney reported the matter, according to the navy, and promptly got a low efficiency rating and a transfer to inactive duty from officer in charge."

Looks like after the events of Dec. 7, 1941, there really shouldn't have been the necessity for more than one Pearl Harbor investigation.

In view of the sacrifice and heroism shown by so many in our armed forces, we wonder how others who have been guilty of such contemptible deeds as those described in Moore's story, and who have so callously and with such astounding gall thwarted the conscientious endeavors of officers like Stickney to do their duty—we wonder how they can ever feel right within their own minds, to say nothing of looking their comrades in the service, or the people at home, in the face.

We are prepared for treachery from the enemy, but hardly from our own people. The greed and carelessness, the wilful appropriation by an individual of that which belongs to the nation, as brought out in the investigation reported by Moore—these are hardly in keeping, we believe, with the pledges of loyalty which Blodgett must have made when he entered on his duties with the navy.

No doubt others were implicated, and no doubt also, this was not an isolated instance. The fact that an Admiral McCain can drive himself to the point of fatal exhaustion in his unceasing efforts to win victory makes all the more shocking the dereliction of an officer who should by right have been supporting him (and the other officers and men of our country's forces) to the full extent of his ability—all the more reprehensible.

We do not believe that the comrades of those who died or were injured; the home folks who saw sons, husbands or fathers leave, with the expectation that they might not return, and who did without their little luxuries and worked long hours in order to do their own part—we do not believe that they will look with approval on the actions of those who would steal that which had been entrusted to them for safekeeping.

But we believe that they will be well pleased with the news conveyed in the last paragraph's of Moore's story—

"The committee heard a letter from Adm. Nimitz in which he blistered the court martial for acquitting Blodgett, and Blodgett for his part in the situation when meats were being supplied 'at great sacrifice' by the people of the United States.

"Blodgett has been retired.

"As for Stickney, 'the old buttinsky':

"Well, he has been cited for devotion to duty, promoted to colonel, and—

"Named as the expert who will investigate the Hawaiian area under the supervision of Adm. Doyle."

He's Still a Long Way from Home!

...Yes, the war was no pink tea. With V-J Day many a fighting man was too tired to think. For a long time we're going to have to do a lot of "thinking" and "doing" for the men who have done their part in winning the complete victory.

...That will cost money. There were well over a million casualties during this most destructive of wars. Many of these men will have to have medical care and treatment for a long time to come. Others need guidance before they can return to normal life. Millions of dollars will be needed for

this and other rehabilitation work.

...That's why this Victory Loan is so important. It's your chance to prove to your fighting men that they are not forgotten ... that we can never repay them for what they have done.

... Gaze deep into your heart—and remember and act. Victory has brought us tremendous obligations. Every American must do his part in this great task. Right now, our job is to buy more bonds than ever before during the Victory Loan. Buy them in humble gratitude—*buy them now.*

Soft Corn . . .

(Continued from Page 1)
operator must depend upon the various methods of getting maximum natural air movement through the corn. Adapting Crib for Soft Corn

Since a great deal of water must be removed from soft corn, ordinary cribs must be modified to provide additional air circulation. Following are the principal recommendations for making such changes:

1. Use an A-shaped frame lengthwise through the center of the crib. The purpose of the A frame is to admit air to the center of the crib and reduce the distance through the mass of corn to 4 feet or less at any point.
2. Build an air duct to divide the crib. The natural air movement can be increased by erecting a division lengthwise through the center of the crib. A double wall can be made using 2 inch by 4-inch or 2 inch by 6 inch, upright and regular cribbing, wire, or snow fence covering. The division should be about one foot wide. The ends of the crib should be open to admit air to the ventilator.
3. Use a method of opening air passages as the corn settles. Placing posts, rails, planks, or board braces in a slanting position, resting against the walls and spaced at intervals through the crib, will allow air ducts to be opened under them as the corn settles. This arrangement provides space for the center to the outside walls through which warm moist air will be removed.

Feeding Soft Corn
Experience has shown that soft corn should be fed before warm spring weather or else much of it will mold and lose feeding value. For best results the badly molded ears should be sorted out.
Although each pound of dry matter in soft corn has about as much feeding value as each pound of dry matter in hard corn, stock will not eat enough of the low grade corn to get fat quickly. Its value per bushel depends upon the percentage of moisture. For feeding to steers, calves

WHAT TO DO FOR BOWEL STOPPAGE IN LIVESTOCK

When a cow loses her appetite and refuses to eat, or eats very sparingly the chances are that she is suffering from constipation, usually caused by partial paralysis of the bowels. To help relieve this condition, give:

Dr. David Roberts
LAXOTONE

Do not drench cattle for bowel stoppage! Give LAXOTONE dry, on the tongue. Easier, safer and more reliable than a physic or old-fashioned drenching, which is always dangerous. Don't be without a can of LAXOTONE handy at all times.

There is a Dr. David Roberts prescription for every curable animal ailment. We carry a complete line of these prepared prescriptions. Stop in and stock up the next time you are in town.

NOTICE
To All Motorists

Every motorist who values his right to drive should be familiar with the provisions of the new Illinois Motor Vehicle Safety Responsibility Law which will become effective January 1, 1946.

This was emphasized today by S. Boyer Nelson of the Nelson Real Estate and Insurance agency.

The new law, he explained, provides that automobile owners and operators who become involved in accidents causing bodily injury or death, or causing more than \$50 damage to the property of any one person must meet stringent requirements or face suspension of their drivers' licenses and automobile registration certificates.

These requirements are that such owners and operators shall have adequate and acceptable Automobile Liability Insurance or shall deposit with the Secretary of State security (up to \$11,000 in cash, negotiable securities or other acceptable collateral) to cover the damages for which they may be held liable.

The easiest and simplest way for a motorist to meet the requirements of the law, said Mr. S. Nelson, is to have Automobile Liability Insurance. His policy, provided it is written by a company authorized to do business in Illinois, will be acceptable as security and the motorist will not, in the event of an accident, have to furnish other security. Furthermore, his policy will be acceptable proof of future financial responsibility.

In addition, concluded Mr. Nelson,

an Automobile Liability Insurance policy will pay, up to the limits purchased, any final judgment which may be entered against the policyholder as the result of an automobile accident.

HELLO!

Does an AMERICAN
Live Here?

We are neighbors of yours who have been asked to call on you . . . to offer you a grand opportunity. We aren't making any money out of this. We simply want to deliver a message from your government.

WILL YOU ACCEPT
THIS MESSAGE?

WHAT WE OFFER IS THE OPPORTUNITY TO HELP PAY FOR THE FOOD AND MEDICAL SUPPLIES NEEDED TO BRING OUR FIGHTING MEN BACK SOON! IN ADDITION, IF THIS VICTORY LOAN IS A SUCCESS IT WILL MEAN THAT RECONVERSION CAN GO FORWARD ON A SOUND BASIS, THAT INFLATIONARY TRENDS WILL HAVE BEEN RETARDED—THAT AMERICA WILL BE ABLE TO PROCEED CONFIDENTLY INTO THE WORLD OF PEACE. WE ASK YOU TO BUY MORE EXTRA WAR BONDS THAN EVER BEFORE—NOW, IN THE GREAT VICTORY WAR LOAN.

TALK TO THE
VICTORY VOLUNTEERS!

A Victory Volunteer will call on you soon, at your home or place of business. He—or she—will ask you to decide how much extra you can put into Bonds during the Victory Loan.

Listen to that Victory Volunteer. Let him explain why it is so necessary for you to buy more extra Victory Bonds than ever . . . because the cost of rehabilitation of our fighting men and the return to peacetime economy requires the total effort of every American.

FIND OUT THE
PERSONAL ADVANTAGES
IN BUYING BONDS

You know, of course, that you are lending your money when you buy Victory Bonds; that in ten years you'll get back four dollars for every three you invest in "E" Bonds now. But further than that, let the Victory Volunteer explain how your purchase of Bonds now will help keep America prosperous in the days to come . . . how Victory Bonds can represent a financial reserve for you, quickly convertible to cash in an emergency . . . why Victory Bonds are the safest investment in the world.

**The law* now says—
YOU CAN'T DRIVE
YOUR CAR**

IF you should have an accident and lack the money or insurance to cover possible claims that may follow: Here's how this new law works:

If you have an automobile accident which kills or injures any other person or causes over \$50 property damage, you must—within 60 days—do one of these things:

1. Show you have Automobile Insurance that covers the accident, or
2. Prove that you have arranged to pay any resulting claims against you, or have been cleared of liability for such claims, or
3. Put up cash or other securities, as required by state authorities, sufficient to cover possible claims, up to as much as \$10,000 for death or injury cases, and \$1,000 for property damage.

Unless these requirements are met promptly, your license will be suspended and you will be forbidden to use any car in this state.
